Reference: Saikiran Sondarkar | sai@itm.edu

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering undergraduate with strong foundations in data structures, algorithms, and full-stack development (MERN, Python/Flask). Built projects spanning graph-based pathfinding, AI-integrated web platforms (Gemini API), MERN trading tools, and statistically-driven customer analytics, and uses AI coding assistants (GitHub Copilot, ChatGPT) regularly to speed up development, debugging, and testing. Brings hands-on UI/UX and product experience from internships at Engaze and LetsUpgrade, with a growing focus on backend systems, APIs, and data analysis. Eager to contribute to a fast-paced, technically rigorous engineering team.

EXPERIENCE

- Engaze | UI/UX Designer Intern | Mumbai, India**

Jul 2025 – Dec 2025

 - Designed wireframes, prototypes, and high-fidelity UI screens in Figma for multiple product features, optimising user flows and visual hierarchy.
 - Collaborated closely with developers for pixel-accurate implementation; ran usability reviews and iterated designs based on feedback to improve engagement.
- LetsUpgrade | Student Intern – UI/UX | Mumbai, India**

Jul 2024 – Aug 2024

 - Created and refined UI designs for a website redesign project, improving layout, navigation flow, and visual hierarchy.
 - Collaborated with the team to align design solutions with branding guidelines and usability goals using Figma.
- LetsUpgrade | Student Intern – Marketing & Analysis | Mumbai, India**

Dec 2023 – Jan 2024

 - Contributed to marketing strategy discussions and campaign ideation for an EduTech platform.
 - Analysed the existing platform UX and provided actionable insights to enhance user engagement and usability.

PROJECTS

- Customer Personality Analysis** / *Python, Pandas, Seaborn, SciPy*
 - Performed end-to-end EDA on a 2,240-customer marketing dataset (29 attributes): missing-value imputation, IQR-based outlier detection/treatment, and feature engineering (Age, Total Spend, Has Kids, Enrollment Year).
 - Validated visual patterns with hypothesis testing (t-test, ANOVA, chi-square, all $p < 0.001$) and built a linear regression model ($R^2 = 0.62$) quantifying income's effect on customer spend.
 - Translated statistical findings into a segmented marketing strategy, presented as a 14-slide data-driven stakeholder deck.
- Smart Traffic Navigation System** / *Python, Flask, Leaflet.js, JavaScript*
 - Built a graph-based route optimisation engine using Dijkstra's algorithm over weighted directed graphs (adjacency list + min-heap priority queue) to compute the shortest and fastest routes between city junctions.
 - Designed a traffic-aware pathfinding module that dynamically recalculates optimal routes as conditions change, exposed through REST APIs.
 - Built an interactive map interface (Leaflet.js, HTML5/CSS3/JS) for real-time route visualisation and comparison across multiple cities.
- YouTube Clone** / *React.js + Gemini API*
 - Built a full-featured video platform with an AI chatbot (Gemini API integration), Study Mode, Sticky Notes, upload functionality, and user profiles.
 - Focused on responsive UI/UX design, component architecture, API handling, and state management across the app.
- Basic Trading Dashboard** / *Node.js + MERN*
 - Built a buy/sell dashboard with candlestick chart visualisation, backend transaction handling, and database integration, applying MERN concepts and backend logic in a real project context.
- Revive Threads** / *Product Management*
 - Designed a sustainable fashion platform: defined MVP, 30+ functional requirements, end-to-end user journeys, and a comprehensive Go-To-Market strategy aligned to user pain points and business goals.

SKILLS

Technical	C, C++, Python, JavaScript (ES6+), Data Structures & Algorithms, Graph Algorithms (Dijkstra's, Greedy), MERN Stack, Flask, DBMS (MySQL), Git, GitHub
Data Analysis	Pandas, NumPy, Seaborn, Matplotlib, SciPy, EDA, Hypothesis Testing, Regression Analysis
AI Tools & APIs	GitHub Copilot, ChatGPT (regular use for coding/debugging/testing), Gemini API integration, REST API design & consumption
Frontend	React.js, HTML, CSS, Leaflet.js, Flutter, Dart, No-code tools
Design & Product	Figma, Wireframing, Prototyping, User Research, Product Thinking, MVP Definition, GTM Strategy

EDUCATION

B.Tech – Computer Science Engineering ITM Skills University	2023 – 2027 (Final Year)
Higher Secondary (12th) Swami Vivekanand Junior College	2021 – 2023
Schooling (1st – 10th) Vivekanand English High School	2011 – 2021

LANGUAGES

English | Hindi | Marathi
